We are proud to have an office located in the Montreal area, the 3rd largest aerospace centre in the world. At this facility, we will focus on the development of new technologies, prototyping and R&D for composites in Aerospace and for other high performance applications.

With over 17 years of experience in aerospace operations, our team of technicians and engineers are innovative and motivated by new challenges. They are committed towards the on time resolution and execution of today's demanding markets, which require superior products and enhanced performance. We welcome and encourage you to take full advantage of our competencies and expertise for your entire Composite needs.
